

Body Wisdom Energy Healing

Module 4

Part 5 – Organ Retrieval and Replacement

Organ Retrieval and Replacement

This technique is always indicated when a client has had an organ removed, or has had a transplant. Even though the organ has been removed physically, it is almost never removed energetically. If it is replaced as in the case of a transplant, the diseased energetic organ (and the behaviors that caused the disease) are never addressed. This is why sometimes the same symptoms recur or other difficulties arise with the replacement. An individual should always have all their energetic organs fully functioning. Therefore, you can also use this technique to heal a diseased organ or one that causes the client chronic difficulty. This can help avoid further physical procedures such as physical removal.

Steps for Organ Retrieval and Replacement

1. Complete a full chelation, removing clouds and mucus on the 2nd and 4th levels.
2. This is one of those special techniques where you will hold a different level than 2nd to do the procedure.
3. Focus on the area of the diseased or physically removed organ.
4. Hold the 5th level with the left hand and hold the 4th level with the right had to support the surgical procedure.
5. Call in Archangel Michael.
6. Using both hands, reach in and gently lift the diseased organ out of the client and hand it off to your guides and angels, specifically Archangel Michael. He will take the diseased organ and provide you with a new one to replace it. Place the new organ in its new home.
7. When this is done, hold 1st level and restructure the area.
8. Fill the space with rose light.
9. Integrate and smooth on all the subsequent levels: 2-7.
10. Remove any remaining clouds or mucus.
11. Chelate up from that point.
12. Close as usual.
