

Pisces:

"I am Pisces, a water sign. I create the twelfth gate of awareness, through which I teach the importance of a compassionate heart. I feel the grief and suffering of humanity

and respond with a loving caring heart that heals. I am deeply spiritual, intuitive, and psychic. I serve the world by dreaming the visions of a peaceful planet and selflessly helping others to create a better life. I completely merge with humanity and the Divine."

The sun is in Pisces generally from February 19 - March 20.

Positional Voice: Pisces may say "the only thing that matters is compassion for everyone (the earthly realm is unimportant), can't you feel the suffering, we are always all one, I feel all your feelings and don't know what mine are, I want to stay in the feeling dreaming state."

Prosperity: Motivated by a deep need to be able to help others through selfless service.

Business: Someone with a lot of the Pisces archetype is great in a profession where they are selflessly caring for others. They make good caring doctors, nurses, social workers, or spiritual advisors. They could run homeless shelters, women's & children's shelters, non-profits, help runaways & people on the streets, and go into prisons in order to offer services to help the prisoners. They deeply want to be of service to those they work with.

May give away their time, energy, and resources to help others until there is nothing left, could become co-dependent.

New Moon for Business: Feel into how your business could better serve humanity and the ways you can make it do so. Tune into how you can bring a greater level of spirituality into your business. Spend time imagining what you want your business to be like and take notes. Create from your dreaming by magnetizing your desires. Notice how you and your business could provide more selfless service.
