A photograph of a city skyline reflected in a pond. In the foreground, there is a large, light-colored building with a gabled roof and a porch. The pond is calm, reflecting the buildings and the sky. In the background, there are several tall buildings, including a prominent one with a blue glass facade. The scene is framed by dense green trees on the right and left sides.

16th Gene Key

Miracle Siddhis: Mastery

Gift: Versatility

Shadow: Indifference

Shadow: Indifference

At the shadow frequency one of the most powerful and pervasive forces that keeps you from perceiving a higher reality is indifference.

As long as you are *indifferent*, you can never be *different*.

This is the key to the 16th Shadow, which concerns the very human fear of leaving your comfort zone and fully embracing change in your life.

Shadow: Indifference

One of the primary excuses human beings use for not doing what they truly want in life is the excuse that they don't have enough time.

Time itself is as fluid as water, and can be bent, shortened, twisted, lengthened, and even stopped. The moment you take a stand and begin to follow your dreams, time becomes your ally rather than your enemy, automatically adapting itself to fit your needs.

p112

Shadow: Indifference

The other major excuse of those under the spell of this Shadow is “I’m not ready yet?”

Again, this excuse is based on a false notion of time. The truth is you are always ready. You are ready right now. If you keep postponing your dreams, they will always remain dreams. If you actually have the courage to begin them, you will learn as you go along.

Shadow: Indifference

The 16th Shadow puts all its emphasis on skills, techniques and systems rather than on the human spirit that enlivens them.

These people can become addicted to information and techniques.

p113

Shadow: Indifference

Your enthusiasm has the power to overcome the mass propaganda telling you that your dreams are impossible, and your courage is the sword protecting you from individual pressure that threatens to choke you.

With this new found courage you can finally stand as a fully embodied human presence.

There is a deep entrepreneurial spirit here in this genetic codon.

p113

Gift: Versatility

The Gift level of frequency is an energy field that you *enter into*, rather than being defined by a particular set of skills.

In the original Chinese I Ching, this 16th hexagram was related to the arts—to music, art, and dance.

p115

Gift: Versatility

The Gift level is the level that we refer to as genius and the nature of genius is versatility. One has the ability to understand an energy signature that pervades all creation.

p115

Gift: Versatility

The 16th Gene Key forms part of the Ring of Prosperity, and along with the 45th Gene Key – which is about group synergy– this chemical combination is the master-program in your body for activating true prosperity.

True prosperity is brought about by people following their genius whilst working together collectively.

Miracle Siddhis: Mastery

Just as the DNA in every cell of
your
body contains the blueprints for all
life, so the 16th Siddhi activates the
blueprints of **mastery** of all human
fields of endeavor.

16th Gene Key
Miracle Siddhis: Mastery

The word enthusiasm derives from the Latin and Greek meaning to be posed by the breath of God/dess. As the Divine currents flood human beings, shattering their identification with the world of form, so God/dess has her play through us and one of the forms of play is to display **mastery over creation.**

*Magically aligning
with mastery skills
as a true alchemist.*

What is mastery?

Mastery is the ability to blend skills and knowledge in a specific area of practice – a profession, trade, athletics, science or the arts. Mastery is practice not knowledge alone. Mastery of any field takes instruction, practice, stamina, setbacks, and intentionality. After years of practice, one knows exactly when and how to swing a bat to get a homerun; read a P&L to get at the subtleties of an organization; recognize students' needs and instantly redesign a presentation; or hear a certain sound and know a machine is about to malfunction. (Mastery Works)

Create in a rhythmic dance alignment with the elemental forces.

“Almost without exception, those we know as masters are dedicated to the fundamentals of their calling. They are zealots of practice, connoisseurs of the small, incremental step. At the same time – and here’s the paradox – these people are precisely the ones who are likely to challenge previous limits, to take risks for the sake of higher performance, and seen to become obsessive at times in that pursuit. Clearly, for them the key is not either/or, it’s both/and.”

....George Leonard (Mastery Works)

Clarity...

In order to be a Master, you must be crystal clear on your mission and vision...

You must know what your Creatrix Task is.

This may not be a profession or business.

It could be love, or healing, or bringing wisdom.

All of you are Masters or you would not be in this class.

Since we are what we create, then it becomes important and necessary that our emissions are in harmony with all life everywhere. We come to understand that everything we think, feel and do creates the world we must live in. Therefore ordinary life here on Earth can be seen as a school, a place where each moment of life gives us lessons that can be directly translated into the next world. No wonder Egypt and most of the ancient civilizations regarded death with such reverence. Death, no matter how it comes, is the doorway of darkness into the Void that leads into the brilliant light of the higher worlds of life. If mastered, it leads directly into a conscious connection with all life everywhere—eternal life!

So what about these Earthly lessons? The truth is that the Source of all life is in the eyes of every person created. So even here on Earth, great intelligence and wisdom and love are present in every moment inside

each person. Once this is seen, then it becomes clear that your thoughts, feelings and actions are the key. You know exactly what to do. In simple words, it's perfecting your character. The shining diamonds in your character become the survival tools of ascension.

Buddha, Mother Mary, Lao-tsu, Mohammed, Jesus, Abraham, Krishna, Babaji, Sister Teresa and about 8,000 other great masters of the eternal light—these are your schoolteachers and the heroes of life. By their examples, they show you how to build your character. All of them feel that loving your neighbor is the primary key. It brings order into the world you create. It gives you eternal life. Do you see?

In the **Melchizedek** transition, as you pass through what are called stargates and go from one area of existence to another, the only way you can get through is by thinking, feeling and being very specific emotional and mental patterns. These patterns generally come in sets of five or six (see chapter 13, update 5). The **pattern** I used to enter this dimension was *love, truth and beauty, trust, harmony and peace*. There are many others. They are like codes or keys that allow you to pass the guardians. If the guardians sense that you are ready for the world they guard, they will let you through. If they do not, they will chase you back to the world from which you came. It's just their job—and you set it up that way.

If you can just sit there and keep chanting those patterns of love, truth and beauty, trust, harmony and peace, you don't have to worry about a thing. That's the female **pattern** (fig. 18-1). There are other patterns. There's a male **pattern** (fig. 18-2), which is *compassion, humility and wisdom, unity, love and truth*. All **stargate** patterns have love and truth.
